First Name: Matthew  
Last Name: Ehrhardt  
Institution: St. Jude Children's Research Hospital  
Address 1: 262 Danny Thomas Pl  
Address 2: MS 735  
City: Memphis  
State/Province/Region: TN  
Country: US  
Zip/Postal Code: 38138  
Phone Number: 901-595-5913  
Alternate Phone Number: 901-595-5847  
Email Address: matthew.ehrhardt@stjude.org

Section: Project Requirements and Description

Group: Requirements to submit AOI

A comprehensive review of previously published data has been completed. Yes
The specific aims are clear and focused. Yes
The investigator has appropriate experience and expertise to develop the concept proposal; if not, has identified a mentor or senior co-investigator. Yes
The investigator agrees to develop an initial draft of the concept proposal within 6 weeks of approval of the AOI and to finalize the concept proposal within 6 months. Yes

Project Title: Evaluation of Cardiovascular Health Outcomes among Survivors 2 (ECHOS-2)

Planned research population (eligibility criteria):
Eligible participants will include survivors who (1) CCSS cohort participants; (2) age 25 years or older; (3) treated with anthracyclines or chest-directed RT involving cardiac structures; (3) do not have a history of cardiomyopathy; (4) have not had an echocardiogram in the previous 5 years; (5) are not actively participating in a long-term follow-up program that provided risk-based health screening; (6) have a previous history of successful independent (non-surrogate) response to CCSS survivors (reading level for non-medical items is 4th-6th grade Fleisch-Kincaid Level; (8) have a smartphone; and (9) are English-speaking.

Proposed specific aims:
Primary aim: Determine the effectiveness of: (1) a smartphone-based Patient Activation (PA) intervention and (2) PCP activation added to patient activation (PA+PCP), compared to control (C) (ECHOS1 intervention - targeted print materials) on completion of an echocardiogram.
Hypotheses: Survivors randomized to PA or PA+PCP will be more likely to complete screening than those in C.

Secondary aims:
1. Determine the effectiveness of PA+PCP compared to PA on rates of echocardiogram completion.
2. Explore moderating and mediating patient and PCP-level factors (from baseline and 12-month surveys of participants and their PCPs) that predict echocardiogram completion and timing.
3. Estimate (1) the replication costs of the interventions and (2) costs resulting from the interventions.
Will the project require non-CCSS funding to complete? : Yes
If yes, what would be the anticipated source(s) and timeline(s) for securing funding? : Applying to March 2019 U01 RFA and would continue through R01 cycles if funding not obtained

**Group: Does this project require contact of CCSS study subjects for:**
Additional self-reported information : Yes
Biological samples : No
Medical record data : Yes
If yes to any of the above, please briefly describe. :
we propose using the Eureka platform to obtain PCP info and self-report of screening echocardiogram adherence. Follow-up with PCP to obtain echo report as confirmation would then occur.

**Group: What CCSS Working Group(s) would likely be involved? (Check all that apply)**
Second Malignancy : 
Chronic Disease : Secondary
Psychology / Neuropsychology : 
Genetics : 
Cancer Control : Primary
Epidemiology / Biostatistics : 

**Section: Outcomes or Correlative Factors**
Late mortality : 
Second Malignancy :

Chemotherapy:
Radiation therapy:
Surgery:

**Section: Anticipated Sources of Statistical Support**
CCSS Statistical Center: Yes
Local institutional statistician: Yes
If local, please provide the name(s) and contact information of the statistician(s) to be involved.:
Propose working with Yutaka Yasui to identify an analyst TBD
Will this project utilize CCSS biologic samples?: No
If yes, which of the following?:
If other, please explain:

**Section: Other General Comments**
Other General Comments:
I agree to share this information with St. Jude: Yes
