Project Title	Longitudinal Patterns and Predictors of Psychiatric Comorbidities and Pain in Survivors of Childhood Cancer
----------------------	---

Planned research population (eligibility criteria)

Survivors and Siblings who completed the BSI-18 and measures of pain (migraine and SF36) at baseline (original and expansion) and all available follow-up surveys.

Proposed specific aims

Aim 1: Examine longitudinal patterns of comorbidity for psychiatric symptoms assessed using the BSI-18 and their relationship to pain in survivors from baseline to follow-up 7

Aim 2: Identify demographic, diagnosis, and treatment-related predictors of psychiatric comorbidities and pain (e.g., sex, age at diagnosis, diagnosis, treatment history)

Aim 3: Identify chronic health conditions associated with psychiatric comorbidities and pain

Aim 4: Identify functional limitations (e.g., unemployment, non-independent living, assistance with needs) associated with patterns of psychiatric comorbidities.

Will the project require non-CCSS funding to complete?

No

If yes, what would be the anticipated source(s) and timeline(s) for securing funding?

Does this project require contact of CCSS study subjects for:

Additional self-reported information	No
Biological samples	No
Medical record data	No

If yes to any of the above, please briefly describe.
