<b>Project Title</b>	IMPACC: Implementing Messaging to Promote Activity in survivors of Childhood Cancer
----------------------	---

### Planned research population (eligibility criteria)

Survivors from the CCSS cohort who are over the age of 18 years and have access to an electronic device with Wifi access to complete additional study measures are eligible for this study. Pre-screening methods will be used to further narrow down the study sample.

### Proposed specific aims

1. To conduct semi-structured qualitative interviews with adult survivors of childhood cancer to identify beliefs and experiences that shape positive perceived impact of cancer on exercise.
2. To conduct a pilot study to examine the effects of a remote digital health messaging intervention on 1) perceived cancer impact, and 2) physical activity level in inactive adult survivors of childhood cancer with negative perception of cancer impact on exercise.

Will the project require non-CCSS funding to complete?

No

If yes, what would be the anticipated source(s) and timeline(s) for securing funding?

Does this project require contact of CCSS study subjects for:

Additional self-reported information	Yes
Biological samples	No
Medical record data	No

If yes to any of the above, please briefly describe.
