Project Title A comparison of functional outcomes between sarcoma survivors with surgery or radiation as their local control

Planned research population (eligibility criteria) Sarcoma survivors (bone and STS) With mraf data Completed baseline and fu2 surveys

Proposed specific aims To compare functional outcomes as measured by the role physical, physical function, bodily pain, general health and vitality scales of the SF-36 between individuals treated for childhood sarcoma who received different combinations of surgery, radiation, and chemotherapy to treat their original cancer.

Will the project require non-CCSS funding to complete? No

If yes, what would be the anticipated source(s) and timeline(s) for securing funding?

Does this project require contact of CCSS study subjects for . . .

Additional self-reported information No

Biological Samples No

Medical record data Yes

If yes to any of the above, please briefly describe. Surgery - including procedural code and text Radiation - location and detailed dose Chemotherapy - specific agents and dose when available

What CCSS Working Group(s) would likely be involved? (Check all that apply)

Second Malignancy

Primary - No

Secondary - No

Chronic Disease

Primary - No

Secondary - Yes

Reproductive

Primary - No

Anticipated sources of statistical support

CCSS Statistical Center Yes

Local institutional statistician

If local, please provide the name(s) and contact information of the statistician(s) to be involved.

Will this project utilize CCSS biologic samples? No

If yes, which of the following?

Buccal cell DNA

Peripheral blood

Lymphoblastoid cell lines

Second malignancy pathology samples
Other requiring collection of samples
If other, please explain

Other general comments Kiri Ness will assist with this concept as senior author if permitted
