Project Title: Associations between special education services, educational attainment, and chronic health conditions among long-term childhood cancer survivors

Planned research population (eligibility criteria): All survivors and their siblings who completed the original cohort baseline survey and the expanded cohort baseline survey.

Proposed specific aims:

Describe the history and usage of special education services and educational attainment in survivors diagnosed between 1970-1999 as compared to the sibling cohort.

Determine disease- and treatment-related predictors of use of special education services and educational attainment in long-term survivors of childhood cancer.

Examine associations between use of special education services and educational attainment with chronic health conditions in long-term survivors of childhood cancer.
