# CCSS REPRODUCTIVE OUTCOMES WORKING GROUP

- Identification of any additional treatment-related data that should be captured
  - Pregnancy questionnaire (Males) – Delete A.2, A.3, A.4, A.5, A.7; reword A.6 – Was this pregnancy the result of in-vitro fertilization (egg fertilized outside the mother and then repimplanted, test tube baby)? Yes/No; If yes, were the sperm from you? Yes/No; If yes, were the sperm a specimen that you stored in a sperm bank?; Was the egg from your partner? Yes/No; reword B.6 – Add a box “If yes, specify treatment” (see A.8a, A.8b); Delete C.5, C.6, C.7

# CCSS REPRODUCTIVE OUTCOMES WORKING GROUP

- Identification of any additional treatment-related data that should be captured
  - Pregnancy questionnaire (Females) – Delete A.2, A.3, A.4, A.5, A.7; reword A.6 – Was this pregnancy the result of in-vitro fertilization (egg fertilized outside the mother and then reimplanted, test tube baby)? Yes/No; Was the egg from you? Yes/No; If yes, was the egg stored in a bank? If no, was the egg obtained from a bank?; Were the sperm from your partner? Yes/No; reword B.6 – Add a box “If yes, specify treatment” (see A.8a, A.8b); Delete C.5, C.6, C.7

# CCSS REPRODUCTIVE OUTCOMES WORKING GROUP

- Inventory and status of current concept proposals
  - Partners of males pregnancy outcome
  - Female pregnancy outcome
  - Premature menopause
  - Female fertility – gonadal and uterine doses almost complete
  - Male fertility – gonadal doses not complete; ? Apply for LAF grant to complete dosimetry
  - Adverse Pregnancy Outcome – review of pregnancy records almost complete
  - Low birthweight – manuscript completed
  - SMNs, tumor relapse – relation to pregnancy
  - Cancer in offspring
  - Marriage
- Identify concept priorities and problems

# CCSS REPRODUCTIVE OUTCOMES WORKING GROUP

- Summary of future concept proposals – identify those that will be submitted to Publications Committee in the next six months.
  - Pregnancy complications – relation to diagnosis, exposures
  - Cohort of offspring – obtain Social Security Number of reported offspring on next questionnaire
- Status of Ancillary Study proposals
  - Northwestern University – AMH, inhibin and premature menopause
  - Biological specimens from offspring; ? triads
- Priorities for future surveys initial cohort
  - Male psychosexual function
  - Update health of offspring
  - Perception of fertility by survivors
- Priorities for development of intervention studies
