

Cancer Control & Intervention Working Group

CCSS PI Meeting

August 25, 2007

Concept Inventory

- General and risk-based care in survivors of childhood cancer: a comparison of U.S. and Canada.
 - Nathan P et al.
 - ASCO oral presentation 2007
 - Manuscript under review by Pub Committee
- Screening for HCV in long-term survivors of childhood cancer
 - Lansdale M et al.
 - NCI Cancer Survivorship Conference 2006
 - Manuscript draft

Concept Inventory

- Alcohol use in cancer survivors, Lown A
 - Drinking in childhood cancer survivors compared to the general population. Addiction
 - K award ACS career development proposals submitted
- Late effects and smoking among survivors of childhood cancer: the role of attention, overweight and pubertal status. Shum L et al.
 - Analysis awaiting approval by biostatistics

Concept Inventory

- Influence of regional access on follow-up care. Caplin D et al.
 - Analysis in progress
- Follow-up care in cancer survivors: newsletters can't do it alone. Mertens A et al.
 - Analysis completed; manuscript in preparation
 - Am Psychosocial Oncology Society 2006 oral presentation
- Physical activity patterns and predictors of sedentary lifestyle among adult survivors of childhood cancer. Ness K et al.
 - Analysis in progress

Ancillary Studies

- Project Vision (Oeffinger): LAF
 - To assess feasibility and study design of RCT to test info-based intervention through CCSS
 - 9th Niagara Late Effects Conference 2006
 - Study completed; Manuscript in preparation
- Partnership for Health 1 & 2 (Emmons): NCI
 - To evaluate effectiveness of peer-based counseling intervention for smoking cessation
 - Study completed; Manuscripts published
 - To evaluate effectiveness of web-based counseling intervention for smoking cessation
 - Study in progress

Ancillary Studies

- **Survivor Health Behaviors (Cox): NCI**
 - To evaluate mediators of survivor health behaviors
 - Physical activity manuscript submitted,
 - Cancer screening mediators; manuscript draft
- **Breast Cancer Screening (Oeffinger): NCI**
 - To determine prevalence/frequency of mammography in > 25 yr old treated with 'chest' radiation
 - Analysis in process; manuscripts in preparation

Ancillary Studies

- Promoting Health Monitoring (Hudson): NCI
 - RCT evaluating generic v. tailored v. tailored + proactive telephone counseling on cancer-related health screening
 - Revised proposal submitted June 2007
- EMPOWER Study (Oeffinger): NCI
 - Among women age 27-39 treated with chest RT, to test the efficacy of a step-wise targeted intervention in a two-arm RCT aimed at increasing the likelihood of screening mammography
 - Submission planned for Oct 2007

Ancillary Studies

- Health risk communication regarding skin cancer. Mertens A et al. Under development
- Health information seeking by childhood cancer survivors. Mertens A et al. Analysis completed; manuscript in prep

Future Concept Proposals

- Late hospitalizations in 5-years survivors
- Relationship of health behaviors and chronic disease and mental health
- Relationship of BMI, physical activity, and mental health
- Follow-up health behaviors of cohort
 - Tobacco use
 - General cancer screening
 - Cancer-related health screening

Priority Analyses 2007 Survey

- Longitudinal changes in
 - Health status
 - Functional status
 - Health care utilization patterns
 - Health behaviors & practices

Future Questionnaire Items

- Assessment of falls
- Assessment of fractions

Public Use Database Elements

- Tobacco outcomes
- Alcohol outcomes (baseline)
- General health (single item, N15)
- Physical activity (follow-up 2)
- Cancer screening (baseline, follow-up 2)
